

Sprint Retrospective 1

Date

@February 14, 2023

Attendees

All

Good

Jira has been set up correctly now. The team all understand how to work in Jira now so that there is consistency across the project

Bad

Didn't break user stories down into small enough tasks. This created some confusion regarding workloads

Ideas

As no one in the group has any experience in creating a project like this the idea of pair programming may be implemented to help assist each other.

Actions

Git review channel has been added to Teams. To keep specific topics out of the general chat.
